We should be able to send an email to all active djangonauts in the session with their certification and final email. The certification generation code can be ported from <https://github.com/djangonaut-space/certificate-automation>

This should occur automatically on the last day of the session, but also have an admin action to resend it.

- ☐ Add django-crontask ...
- ☐ Integrate certification automation project ...
 - ☐ Rendering certificate template
 - ☐ Calling subprocess to run shotscraper
 - ☐ Return PDF binary
 - ☐ Update the docker build to call `shotscraper install`
- ☐ Add `SessionMembershipNotification` model as 1:1 to `SessionMembership`. Add `datetime` for `final_email_sent_at`. ...
- ☐ Add email task that iterates through djangonaut session members without final email property set and sends final email ...
- ☐ Final email task should create email with content from above, generate PDF from certificate automation, then attach it as a PDF. Set `final_email_sent_at` ...
- ☐ Look for other fields to migrate to `SessionMembershipNotification` ...
